

Priyank Pahwa

Systems-Focused Full Stack Engineer

Gurugram, Haryana | priyankpahwa41@gmail.com | +91 8595399258 | Portfolio | LinkedIn | Github

PROFESSIONAL SUMMARY

Full-stack engineer with experience building workflow-driven platforms across AI wellness, subscription billing, logistics, and fintech systems. Skilled in React, Spring Boot, MySQL, and backend architecture with strong ownership in understanding systems end-to-end — from workflows and APIs to technical presentations and execution. Incoming Accenture ASE and Infosys engineering intern with growing interest in platform systems, product execution, and technology leadership.

EDUCATION

Manipal University Jaipur, B.Tech. in Computer Science

Sep 2022 – Jul 2026

• GPA: 8.5/10.0 **Coursework:** DBMS, Data Structures, Algorithms, Operating Systems, OOP

EXPERIENCE

Systems Engineer Intern | Infosys, Mysore

Jan 2026 – Present

- Designed and implemented subscription billing workflows including proration handling, recurring billing automation, retry orchestration, and state-driven subscription lifecycle management using Spring Boot and MySQL.
- Contributed across backend architecture, REST APIs, frontend integration, and database modeling for an enterprise-style revenue management platform with 23 relational tables.
- Led technical walkthroughs during project reviews by explaining architecture decisions, workflow execution paths, and module interactions end-to-end.
- Built frontend workflows in React and TypeScript while integrating secure session-based authentication and role-based access controls.

PROJECTS

Seriva — AI Wellness Companion | Live Demo | Github

Jun 2025 – Sep 2025

Full-Stack Developer

- Architected end-to-end AI wellness platform integrating 3D avatar interaction (Three.js) with conversational AI; engineered real-time frontend-backend flows for responsive UI.
- Implemented secure API handling and production configuration using Google Cloud Secret Manager and IAM-based access control.

PharmaFleet — Medicine Inventory System | Demo Video | Github

Feb 2025 – Apr 2025

Product Designer & Full-Stack Developer

- Built digital inventory management replacing manual workflows, reducing transcription errors by 70%+; designed centralized dashboard with audit trails and compliance reporting.
- Structured database schema for high-frequency updates while maintaining data accuracy; translated operational workflows into system logic reducing manual dependency.

SKILLS

Systems & Architecture: REST API Design, Authentication & Authorization, Database Modeling, Workflow Architecture, State Management, Billing Systems

Cloud & Deployment: Google Cloud Platform, Firebase, Docker, CI/CD Concepts, Vercel

Engineering Stack: React, TypeScript, Java, Spring Boot, Node.js, Express, MySQL

Tools: JIRA, Git/GitHub, Postman, DBeaver, VS Code, Figma, Confluence

Collaboration & Execution: Agile/Scrum, Technical Communication, Feature Planning, Stakeholder Coordination, JIRA, Confluence
